Environmental Technology for Impact

Recovery of valuable resources
from waste and wastewater

Environmental Technology for Impact 2015 (ETEI2015) is a 2-day international conference organized on the occasion of the 50th anniversary of the Sub-department of Environmental Technology of Wageningen University. The conference will focus on the following themes and topics:

- **Biological recovery technologies**

Production of fuels, energy, chemicals, nutrients, metals and minerals from waste and wastewater.

- **Production of reusable water**

Removal of pathogens and organic micro-pollutants and biological treatment under extreme conditions (temperature and salinity)

- **Urban systems engineering**

Urban and industrial harvesting, the water-resource-food nexus and integration of natural (treatment) systems in urban environments.

Confirmed keynote speakers:

- Lars Angenent, Cornell University
- Mark van Loosdrecht, Delft University of Technology
- Juan Lema, University of Santiago de Compostela
- Jacqueline Cramer, Utrecht University

You are kindly invited to participate in ETEI2015 and to **submit an abstract** using the conference website www.etei2015.org

Deadline of abstract submission	1 Jan 2015
Early registration before	1 Jan 2015
Notification of abstract acceptance	1 Feb 2015

On behalf of the organization,

Cees Buisman, Huub Rijnaarts & Grietje Zeeman.
