Energy in Water - International dialogue and networking

November 1st 2017, 15:00 – 17:00, Holland Pavilion booth 07.430

Energy in Water (EnW) is a European Strategic Cluster Partnership – Going international (ESCPs-4i) which aims to support and harness the growth and innovation potential of European SMEs operating across the water-energy ‘Nexus’. EnW has developed the strategy to drive the international competitiveness of SMEs through developing solutions to global challenges and market opportunities. More information on www.energyinwater.eu

The International Dialogue. This meeting is focusing on generating an international dialogue concerning cooperative activities for the responsible development and use of emerging technologies across the water-energy Nexus. The dialogue is a starting point for enhanced network services that support matchmaking and network sharing towards target countries.

Cluster organisations working in the Energy in Water Cluster Partnership will pitch their services and networking opportunities for European SMEs and knowledge institutes. The dialogue will be closed with networking, after the signing ceremony of the International Partnership Agreement by the Energy in Water partners.

All SMEs and knowledge institutes are welcome to join the International Dialogue and to benefit from the Energy in Water network. During networking further cooperation can be discussed in a more informal setting.

Program:

- 15:00 **Welcome**
- 15:10 **Energy in Water as European Strategic Cluster Partnership**
- 15:20 **SME services from Energy in Water clusters**
- 15:50 **Signing ceremony: Energy in Water International Partnership Agreement**
- 16:00 **Closing**
- 16:30 **Networking: drinks & bites**

Costs of participation: Free. No registration for the dialogue needed, just join us at the Holland Pavilion, booth 07.430, Aquatech Amsterdam. Please note that free registration for Aquatech Amsterdam is required (register [here](#)).

For further networking and matchmaking, Energy in Water cluster partnership also recommends to participate in the [Challenge Response Workshop](#), [Aquamatch](#) and [EnW Watertech tour](#). We would also like to draw your attention to the related EnergyinWater event organised by the NWP & water Alliance, on Tuesday 31th of October from 11:45am till 2:15pm, AquaStage, Hall 7.
